CORE JAVA | JAVA 8 | JAVASCRIPT | REACT.JS | HTML | CSS | SPRING BOOT | REST API | SQL | SPRING SECURITY | JWT | RBAC

Motivated **2025 Computer Science and Engineering graduate** with a foundation in **JavaScript, React.js, HTML, CSS, Core Java, Java 8, Spring Boot, REST APIs, and SQL**. Developed a **React.js Job Application Tracker** using component-based development, React Hooks, state management, controlled forms, reusable components, search, filtering, sorting, Local Storage persistence, and responsive UI development. Familiar with reviewing **Figma UI designs** and translating design concepts into HTML, CSS, JavaScript, and React.js implementations. Hands-on experience developing a **Spring Boot E-Commerce Backend API** with RESTful APIs, Hibernate, MySQL, Spring Security, JWT authentication, RBAC, and layered architecture. Strong understanding of **OOP, Collections, Exception Handling, Data Structures and Algorithms, DBMS, debugging, and API testing**. Interested in developing secure, user-focused software and continuing to build practical frontend and full-stack engineering skills.

EDUCATION

B.Tech in Computer Science and Engineering (Cybersecurity, IoT Inc. Block Chain Technology)
Vasireddy Venkatadri Institute of Technology – 8.02 CGPA

Intermediate(MPC)
Sri Chaitanya Junior College – 86%

SSC
Siddhartha High School – 8.8 GPA

PROFESSIONAL SKILLS

- **Programming Languages:** Core Java(OOPs, Collections, Exception Handling), Java 8,JavaScript
- **Frontend Technologies:** HTML, CSS,React.js, Responsive UI Development
- **React.js:** Components, Props, State Management, Controlled Forms, Event Handling, Conditional Rendering, List Rendering, useState, useEffect, Custom Hooks
- **UI Development:** Figma UI Review, Design-to-Code Understanding, Responsive Design, CSS Grid, CSS Flexbox
- **Backend Technologies:** Spring Boot, Hibernate, RESTful APIs, Spring Security
- **Databases:** SQL, MySQL
- **Software Development:** OOP, Data Structures & Algorithms, DBMS, Collections Framework, Exception Handling, CRUD Operations, Authentication & Authorization, RBAC, Layered Architecture, Controller-Service-Repository Architecture, Debugging, API Testing
- **Tools:** Git, GitHub, Maven, Postman, Eclipse, IntelliJ IDEA, VS Code

PROJECT EXPERIENCE

Job Application Tracker – React.js
Technologies: React.js, JavaScript, HTML, CSS, React Hooks, Local Storage

- Developed a React-based Job Application Tracker to organize and monitor job applications through a centralized dashboard.

- Built reusable components including Navbar, Dashboard, StatCard, SearchBar, FilterBar, ApplicationForm, ApplicationList, and ApplicationCard.
- Implemented application add, edit, delete, duplicate, search, filter, and sorting functionality using React state and event handling.
- Used useState and useEffect for state management, form handling, editing workflows, and application updates.
- Created a reusable custom useLocalStorage hook to persist application data across browser sessions.
- Implemented application status tracking for Applied, Interview, Rejected, and Offer stages with status history.
- Added dashboard statistics to dynamically track total applications and application status counts.
- Implemented reusable utility logic for searching, filtering, and sorting application data.
- Designed a responsive SaaS-style interface using CSS Grid, Flexbox, responsive layouts, modern form controls, and interactive UI states.

E-Commerce Backend API (Spring Boot)

Technologies: Spring Boot, Spring Security, Hibernate, MySQL, MongoDB, Maven

- Designed and developed a backend application using Java and Spring Boot for user and product management.
- Developed and tested RESTful APIs for user and product management using layered architecture.
- Integrated MySQL database for persistent data storage and implemented database operations using JDBC and Hibernate.
- Implemented Controller-Service-Repository architecture to maintain separation of concerns and support clean, maintainable code.
- Implemented Role-Based Access Control (RBAC) to manage user permissions for product CRUD operations.
- Used Spring Security to support application-level authentication and authorization.
- Used Postman to send requests and verify REST API functionality during development.

CERTIFICATIONS

- TCS ION NQT Certified – Jan 2026
- Java Full Stack Developer Training -FLM
